

The Teapot Tempests

(Continued from Page 1, Column 3)

It is too late for reform. The contemporary civilization is over the hill. We can read Yockey's "IMPERIUM" and find out what ought to have been done forty years ago. It is better, though, to read Yockey's essay "WORLD IN FLAMES" to find out what really will happen. The great triumph of the Jews is that they have destroyed the next logical phase of the development of Western Civilization, the phase of "IMPERIUM." The world is now delivered to formlessness.

If you prefer saints and mystics, you might read the third part of the secret of Fatima, which was published by Christian Educational Association. If you prefer military analysis, practically any competent military observer can tell you that World War III is approaching, and that it will signal the end of contemporary civilization.

Why is the present civilization going to be destroyed?

By and large, it deserves destruction. It has degenerated into a den of thieves. We hear a lot about "Nixonomics." The U.S. Presidency is now merely a puppet office; Congress itself is an obsolete and largely worthless institution. The plain fact is that the age of politics is over. The age of economics also is over. There can be no political solution; nor can there be any mere economic solution. Now we are to move into an era of war and religion, including religious wars.

"Nixonomics" is merely another aspect of the fraudulence of our times. Many years ago, the labor unions were organized. The American working man was told that he was moving into Nirvana. Wages would be high. The worker would live forever in a kind of hog's heaven. But then the great exodus of industries began. First, ships were put under foreign flags, and seamen were thrown onto the beach. Nobody cared what happened to seamen. Next, though, kitchen crockery, cameras, tape recorders, and automobiles began to be imported on a vast scale, not from foreign manufacturers, but from American capitalists who had moved abroad. The foreigners who collaborated thought that they had struck gold. Then Nixon pulled the rug from under the dollar. What happens next?

What, for example, will happen to the shipyards of Japan?

Japanese shipyards are holding five billion dollars worth of construction contracts written in dollars. If Nixon succeeds in driving the dollar down by fifteen percent, then the value of the compensation the shipyards will receive will go down 15%; but that is not the end of it; their costs will go up 15%, thus creating a 30% loss between expectations and reality. What happens when the shipyards of Japan go crashing down into bankruptcy? Will the vultures of financial New York move in to pick up the pieces? What happens when the shoe factories of northern Italy go broke, when the toy factories of Japan are driven to the wall and the workers are laid off? The financial vultures are trying to steal the shipyards of Japan and the shoe factories of northern Italy. Surely this time they are trying to get away with more than can be gotten away with. On top of the provocation provided by Israel in the Middle East, this is simply too much. An anti-American alliance will form around the world. Indeed, it is already forming.

There are American patriots who feel that they ought to be doing something about this; but there is nothing they can do. Any "patriotic" organization they can join is ultimately under the control or influence of the enemy, even if its leader is what is called "sincere," because there is no real "third force" organization in the U.S.A. We have only the "right" and the "left," and in that picture there is only one side, namely THE INSIDE. It is impossible to fight a real battle from either a left wing or a right wing stance. It is possible only to sink into the morass or stupid pseudo-controversy in which the money masters have en-

From Argentina comes this photograph of Rudolph Hess just before he took off for England — at the request of Adolf Hitler — to try to negotiate peace between the Allies and Germany. Here is proof positive that, contrary to what the controlled press has claimed, Rudolph Hess did not fly to England on his own volition, nor was it a secret flight. He went to England in the cause of peace and has become the "Prisoner of Peace" of governments claiming to be peace-loving. In this photograph, can be seen Mrs. Hess and officers high in the government of Germany at the time of Hess' historic flight. Until and unless Rudolph Hess is freed from Spandau Prison, where he is the sole inmate, the credibility of all countries involved in his imprisonment (the United States, United Kingdom, Soviet Union, et al) is worthless. Photo courtesy of Rio Negro Press.

trapped western civilization for a hundred years.

Think not, at this late time of the clock, to avoid the global disaster which will chastise and correct the obdurately wicked; think only of how you will conduct yourself when it comes. There will be a real battle to be fought then. The forces of nihilism will attempt to destroy all life on planet Earth; because of the rottenness of modern civilization, they will succeed in destroying a large part of it; but they must be stopped short of total success if your species is to survive at all. That is the real battle which is coming.

Those who will fight in this battle must be capable of operating successfully in the midst of indescribable chaos. They must know that their goal is to secure the survival and social health of a remnant of the human race which will survive the coming debacle. They should know also the principal reasons behind the impending destruction of the contemporary civilization. The present civilization is so far gone in corruption that the real tragedy is not its impending destruction; the real tragedy would be for it to continue, to spread its organized damnation through future times. The disaster which is about to overwhelm the earth is the quite natural and logical consequence of what has gone before.

There are indeed some teapot tempests going on in the American right wing. We are told that Joe Blow is only a pseudo-conservative; the Reverend Gus Gasbag tosses a fierce line of anti-communist slogans, and old maids of both sexes fill his collection plates generously. We know all about the howling idiots who are always hunting radicals under every old maid's bed. We know all of the hoke-flinging rabble who have posed as the saviors of America. The trouble is, they have not saved us, and they never will.

What stand will we take on these issues? Our stand is that anybody who peddles either right wing or left wing hoke deserves horsewhipping and the branding iron. We would like to do this ourselves; but chastisement is more likely to be rendered from high sources. In the end, as they are wafted through the stratosphere in the form of radioactive isotopes, atop the great mushroom clouds, the folly of right-left charlatanny will be finally demonstrated.

APOSTLES OF THE LATTER TIMES ARE HERE

An 8-page brochure of interest to all Christians of good faith. In the opinion of many, the answer to present day problems. This relates to the third secret of Fatima which, in defiance of the express wishes of the Mother of God, has not yet been revealed to the world.

PLEASE, GOD, SEND US A LEADER!

The time has come for us, who have been ostracized from American society for being either Super-Patriots, Neo-Nazis, Neo-Fascists, Anti-Semites, Bigots, Racists, or members of the lunatic fringe, to face up to our hour of truth. Besides having had it like no other people before in the history of organized societies, what we've got in this country, in addition to a whopping nervous breakdown, is a humdinger of a crisis in leadership and at a time when we, as a people lost in the wilderness, need that leadership the most. To put it bluntly, we have no leadership at all. What we've got to put up with, is a lot of humbugs gas-bagging us into oblivion.

Right now, our vaunted leadership is in the process of jockeying into position to participate in the coming race for the Presidency. All are acting coy, all are letting out a lot of pent-up hot air. With great enthusiasm, the bug-eyed press, once our beloved bastion of freedom but now a hole in the dike, is whooping it up for more of the same old cast: Lindsay, Humphrey, Harris, Rockefeller, McGovern, Muskie, Jackson, Bayh, Kennedy, et al. Nixon, having performed his act has had it. Wallace, who once tried to "Stand Up for America" and sat down, is still threatening to do something drastic if the other two parties don't sit up and fly right. Put the whole kit and kaboodle together in one pot, and we could not stew up a leader in a million years. Toss into the pot our two major political parties for seasoning, and the resultant smell would just about be right!

We've had it. We've got nothing, except one, big national headache. We have been baloneyed so much, and are so far gone down the primrose path into One Worldism, that we would need a Genghis Khan for President and an Attila the Hun for Vice President to straighten out this country. But, if one man would listen to our voices in the wilderness, we would have a slight chance to survive as a free nation and as a free people. That is if we would deserve his consideration, we who sat idly by while the press consigned him and his family to limbo.

Perhaps, this one man could give us the spark we need to rally around a solution to our serious national problem. Perhaps, he could be the one man who could unite most of us into a powerful force for good. To be sure, we need him badly! This man is: **CHARLES A. LINDBERGH!**
